1 P R O C E E D I N G S

2 MR. MELTON: If I could have everyone's  
3 attention, I would like to call the 2017 Annual  
4 Meeting of the Membership of the Doña Ana Mutual  
5 Domestic Water Consumers Association to order at --  
6 it appears to be about 7:05 p.m. on the 25th of  
7 January, 2017, in the lunch room of the Doña Ana  
8 Elementary School located at 5551 Camino De Flores  
9 in Las Cruces, New Mexico 88007.

10 First thing I would like to do -- and I've  
11 got to do it myself -- is I would like to ask  
12 everyone to please, if they have a cell phone, a  
13 pager, a tablet, or any other instrument which might  
14 interrupt our meeting, to please either silence them  
15 or turn them off.

16 First of all -- next, I have in my hand  
17 that we have provided Proof of Notice in the  
18 Las Cruces Sun-News, and we have provided -- we do  
19 have a quorum.

20 Is that correct?

21 MS. HORTON: Yes.

22 MR. MELTON: How many members do we have  
23 present?

24 MS. HORTON: 48.

25 MR. MELTON: We have 48 members present.

1 We have slightly over 4,500, so 46 is a quorum. So  
2 therefore I do declare a quorum present.

3 We tried something very new, and I realize  
4 that we irritated a lot of people because we had a  
5 technical malfunction with our system with automated  
6 notifications. Our administrative people assure us  
7 that they're going to work very diligently to avoid  
8 that again in the future. I know I got four notices  
9 myself yesterday.

10 The first order of business is the  
11 approval of the agenda. And I would like to ask you  
12 that, if you make a motion, that you raise your hand  
13 to be recognized by the chair; that you then, when  
14 you're recognized, state your name because we are  
15 transcribing this meeting. We have a court reporter  
16 here. So please state your name and speak loudly so  
17 that you can be heard or come to the microphone and  
18 state your motion.

19 I will now entertain a motion to approve  
20 the agenda of this meeting. Do I have a motion?

21 Please state your name, sir.

22 MR. HOKKANEN: Jack Hokkanen.

23 MR. MELTON: Jack Hokkanen. Mr. Hokkanen  
24 has placed a motion before the body to approve the  
25 agenda for the meeting.

1 Is there a second?

2 MR. GRADWOHL: I second. Paul Gradwohl.

3 MR. MELTON: Paul Gradwohl seconds.

4 Is there any discussion?

5 There being no discussion, we will move to  
6 vote. I would ask that only members vote. And in  
7 this case, unless there is an objection, I will call  
8 for a show of hands. If there is an objection, then  
9 we will issue ballots. All hands -- let me see a  
10 show of hands for all in favor of approving the  
11 agenda as presented.

12 (Hands raised.)

13 MR. MELTON: Could somebody give me a  
14 count, please?

15 You didn't know you were going to get your  
16 exercise this evening too, did you?

17 MS. HORTON: 48.

18 MR. MELTON: All opposed?

19 (No response.)

20 MR. MELTON: Motion carries unanimously.

21 The second item on the agenda is the  
22 introductions. And I would like to start out. I  
23 think most of you know me. I'm Jim Melton,  
24 President of the Association. To my left, the first  
25 gentleman is Dr. Kurt Anderson, our

1 secretary/treasurer. The second gentleman is  
2 Mr. Ray Ponteri, our representative from District  
3 No. 5. The third gentleman is Mr. Jamie Stull, our  
4 representative from District No. 4.

5           Unfortunately, Mr. Justin Sparks, who is  
6 our representative from District No. 3, has a  
7 professional commitment due to his job in Roswell  
8 and is unable to be with us this evening.

9           To my right I have Lilla Reid, who is a  
10 representative of Souder, Miller & Associates, our  
11 engineering firm; our incoming general counsel,  
12 Mr. Joshua Smith; and our retiring general counsel,  
13 Mr. Lee Peters.

14           I also would like to acknowledge the  
15 presence in the audience this evening of two of our  
16 past presidents, Mr. Charles Huestis and Mr. Jim  
17 Robles. Also I understand that a member of the  
18 Colonias Infrastructure Committee has joined us,  
19 Mr. Oscar Butler way back in the corner back there.

20           Okay. Once again, procedures with regard  
21 to the meeting, please, once you're recognized --  
22 now through the remainder of the meeting, once  
23 you're recognized by the chair, please come to the  
24 microphone, speak into the mic, be certain that your  
25 voice is being amplified so everyone in the room can

1 hear you and so that our reporter can hear you.

2 The first item of business is the approval  
3 of the minutes of the April 21, 2016, Special  
4 Membership Meeting.

5 Do I have a motion to approve those  
6 minutes?

7 MR. BUTLER: I'll move, Mr. Chairman.

8 MR. MELTON: Please state your name, sir.

9 MR. BUTLER: Oscar Vasquez Butler.

10 MR. MELTON: Oscar Butler moves that we  
11 accept the minutes of the April 21, 2016 meeting.

12 Is there a second?

13 MS. TATUM: Sandy Tatum. I move to second  
14 the motion to accept the minutes.

15 MR. MELTON: We have a second by Sandra  
16 Tatum to accept the minutes.

17 Is there any discussion with regard to  
18 those minutes?

19 There being no discussion, we will move to  
20 vote. Is there any objection to a show of hands?

21 There being none, I would like to see a  
22 show of hands for all in favor of approving those  
23 minutes.

24 (Hands raised.)

25 MR. MELTON: All opposed?

1 (No response.)

2 MR. MELTON: I see no opposition,  
3 therefore the vote is unanimous.

4 Our new business for this meeting is  
5 approval of the Open Meetings Act Resolution  
6 No. 2017-01. I will entertain a motion for approval  
7 of that resolution.

8 MR. PONTERI: I so move.

9 MR. MELTON: Ray Ponteri moves for  
10 approval of the resolution.

11 Is there a second? Yes, sir.

12 MR. HAYHOE: I second, Jim Hayhoe.

13 MR. MELTON: James Hayhoe, H-a-y-h-o-e?

14 MR. HAYHOE: Yes, sir. You didn't have to  
15 spell it.

16 MR. MELTON: Is there any objection to a  
17 show of hands to approve?

18 The only change in this that I am aware of  
19 is that we actually changed the days of the meeting  
20 from the second and fourth Tuesday to the first and  
21 third Thursday of the month. Otherwise, it's  
22 exactly the same resolution that was passed last  
23 year.

24 All in favor, please indicate by a show of  
25 hands.

1 (Hands raised.)

2 MR. MELTON: All opposed? We have one  
3 opposition; so that would give us 47 and 1.

4 MS. HORTON: 48 and 1.

5 MR. MELTON: 48 and 1. We've got 49  
6 people here. Okay.

7 Now we will move to report. First of all,  
8 I would like to offer kudos to our executive  
9 director, Jennifer Horton, right over here. I  
10 happened to notice and had brought to my attention  
11 by some of the members here a very laudatory profile  
12 that was entered into the January 20, 2017,  
13 Las Cruces Bulletin which gave us a lot of  
14 background on Jennifer and a lot of her  
15 accomplishments. We're very fortunate to have her  
16 in our organization.

17 And additionally, I would like to point  
18 out that she was selected by the New Mexico Finance  
19 Authority to make a presentation at the  
20 Infrastructure Finance Conference about three months  
21 ago in Ruidoso on the subject of multisource  
22 financing for infrastructure projects. And I think  
23 we all are well aware of just exactly how effective  
24 Jennifer is in finding money to be able to help us  
25 improve not only our basic infrastructure but also

1 to improve the sustainability of our systems.

2 So I would like to ask for a round of  
3 applause for Jennifer.

4 (Applause.)

5 MR. MELTON: We continue to grow. We've  
6 actually seen an increase in the number of new  
7 memberships this year from the past couple of years.  
8 We feel this is probably mostly due to an  
9 improvement in the climate for home construction.  
10 As of the 10th of January of 2017, we had a total  
11 membership of 4,543.

12 Transfer of the ownership of the  
13 wastewater collection system for the Village of Doña  
14 Ana is ongoing and awaits final approval by  
15 government agencies outside of the local area. We  
16 will sometime -- and we really don't know when  
17 because we're basically waiting on some Washington  
18 approvals. The wastewater system that was  
19 originally constructed by Doña Ana Mutual that was  
20 then taken over by the County and operated for a  
21 number of years is now being transferred back to us,  
22 and we will become back -- or we will get back into  
23 the wastewater collection business there. At this  
24 point in time, it's imminent. We don't know when.  
25 We don't have any sort of a time frame.

1           We continue to upgrade the quality of our  
2 systems with ongoing projects. I know everyone that  
3 comes out north has seen the acres and acres of blue  
4 pipe and the piles of gravel and the holes in the  
5 ground alongside old U.S. Highway 85 and things like  
6 that. I know the folks up in Picacho Hills are  
7 seeing their skyline view ruined by two big tanks on  
8 it. But they're going to have about 1.8 million  
9 gallons of water up there one of these days and  
10 might be able to even fight a fire on that hill.

11           We've got a number of other projects  
12 ongoing, and our engineering support will give us a  
13 much more in-depth report on what's ongoing and  
14 what's planned for the immediate future.

15           Our financial report will be given later  
16 in the presentation. I will say, though, that our  
17 annual audit has been completed in accordance with  
18 State law. It was completed and submitted to the  
19 State on time. We expect release by the State  
20 Auditor's Office shortly. And once it is released,  
21 in very short order it should be available for  
22 viewing by anyone who cares to do so on the  
23 Auditor's web site.

24           As I said, construction projects will be  
25 covered by our representative from Souder, Miller &

1 Associates.

2           With board issues, there are a couple or  
3 three things I'd like to cover because they seem to  
4 be ongoing issues. And I hope we can put some  
5 things at least to rest, one being an issue of high  
6 usage reported on selected individual services. The  
7 Association has a responsibility for the operation,  
8 installation, ownership, and maintenance of the  
9 water system -- water delivery system from its  
10 source to the output of the meter. The individual  
11 member has responsibility from the output of the  
12 meter to its eventual site of utilization.

13           We do not have a meter in our system that  
14 is over five years old. They are some of the latest  
15 technology. They are positive displacement meters.  
16 They are screened to minimize the possibility of any  
17 sort of foreign material encroaching on them to make  
18 them inaccurate.

19           The Association -- once high usage is  
20 utilized or is recorded, the Association is not  
21 responsible for establishing what caused that high  
22 utilization. We have no control over what happens  
23 once it goes out of our meter. Upon request by the  
24 member, the meter can be removed, remotely tested by  
25 an independent testing agency, and a report -- a

1 copy of the report is then provided to the user.

2 We also, in trying to assist in this, have  
3 recently acquired and we're in the process of  
4 training staff to a capability to log, in excess of  
5 90 days prior to the date of logging of data, on an  
6 hourly basis for utilization of water through that  
7 meter. This capability can also be requested by the  
8 member. Service fees will be assessed to the member  
9 for those services.

10 If the meter, after it is tested, fails to  
11 meet the specifications for accuracy that we  
12 utilize, then the member's account will have  
13 appropriate adjustments applied to it.

14 The second ongoing issue deals with due  
15 date. And this issue has come up somewhat as a  
16 result of us changing the penalty date, the date  
17 that penalties were applied for current charges,  
18 from the 15th of the month to the 25th of the month.  
19 And what has happened in a limited number of cases  
20 is that we have had individuals who have assumed  
21 that the due date for past-due charges -- because if  
22 you look at your bill, you have one entry that shows  
23 past-due charges, one that shows current charges,  
24 and then one that shows amount due.

25 Past-due charges are due to be paid in our

1 office no later than the close of business on the  
2 20th of the month which is the first month after  
3 they are due initially. The current charges for  
4 that bill are due no later than 3:00 p.m. on the  
5 25th of the month in which they're tendered. In  
6 fact, payment is due on any account as soon as the  
7 bill is tendered, and we allow or we permit a grace  
8 period until 3:00 p.m. on the 25th to get it paid.

9           The only time that the dates will change  
10 from the 20th and the 25th of the month are when one  
11 of those days falls on a Saturday, a Sunday, or an  
12 Association holiday. And in those cases, those  
13 dates will slide backwards to the next business day  
14 following that date. They never slide forward. Two  
15 other instances in which those dates change is as an  
16 act of compassion we refrain from discontinuing  
17 service in the week of Thanksgiving and until after  
18 Christmas, after Christmas Day.

19           But those two dates, the 20th and the  
20 25th, never move forward. So they can be assumed to  
21 be the dates that things must be paid. The bottom  
22 line really is that, to avoid service interruptions  
23 and to minimize penalty charges, if you have your  
24 payment in the office no later than the close of  
25 business on the 20th, then there's no problem.

1           We've had a couple of issues where people  
2     have had problems with the drop box in the office  
3     being locked and not able to put payment in the drop  
4     box. The reason for that is that by policy, at  
5     close of business the last business day prior to  
6     disconnect day, which is normally the 21st, because  
7     we initiate disconnections or interruption of  
8     services on the 21st after that 20th cut-off date,  
9     at close of business on the last business day prior  
10    to cut-off day or disconnect day, we lock the lock  
11    box, and it stays locked until after close of  
12    business on cut-off day. It's a policy that's been  
13    longstanding, and it will continue.

14           An issue that has also been brought to the  
15    attention of the Board and the Board has been  
16    questioned about is the status of the Articles of  
17    Incorporation and Bylaws updates. This is an  
18    ongoing issue. It was initiated, to my knowledge,  
19    in 2014 as a result of review by the New Mexico  
20    Environment Department which resulted in them making  
21    some recommendations, not making -- telling us we  
22    had to change them or anything else, but  
23    recommending that we review our Articles of  
24    Incorporation and Bylaws for potential clarification  
25    of some issues.

1           At that time a committee was formed to  
2 provide some suggestions. It originated with twelve  
3 members, two from each of the five districts and two  
4 representatives from the Board of Directors. The  
5 effort appears to have really received less than  
6 enthusiastic support from all of its members. There  
7 were a number of them that were very conscientious  
8 and did work on this.

9           However, eventually it degenerated to a  
10 very, very few people. No documented records can be  
11 identified due to individuals who lost interest in  
12 it having, you know, walked away from it and either  
13 destroyed whatever notes they had taken and things  
14 of that nature. Individuals have been queried. All  
15 twelve of them have been queried. Responses have  
16 been received, and their comments and whatnot have  
17 been entered into considerations as we go forward.

18           I would like to thank those twelve people.  
19 I do not have a list of them. I did not make that  
20 list to call them out by name. I have thanked all  
21 of them by letter personally, and I would like to  
22 thank -- if you know one of them, I'd like to ask  
23 you to thank them for giving us their time.

24           The retirement of Mr. Peters and the  
25 transition to Mr. Smith as our general counsel,

1 which is in progress as we speak, has worked to a  
2 slight extent to give us a bit of delay. We now are  
3 moving forward again. And we will hopefully in the  
4 not terribly distant future -- I don't have a date  
5 that I can assign to it. But it is in progress, and  
6 he will work with the Board of Directors to try and  
7 provide a set of potential revisions to be  
8 incorporated into a draft set of resolutions during  
9 a Board of Directors workshop which we will schedule  
10 after he's completed his review.

11           Once those draft documents have been  
12 presented or have been generated, they will be  
13 presented to the public at three public meetings.  
14 One will be held in the Picacho Hills area, one in  
15 the Doña Ana area, and one in the Fort Selden/Radium  
16 Springs area.

17           At those meetings public comment will be  
18 accepted, will be recorded, and then the Board of  
19 Directors will come back probably into another  
20 workshop, formulate final resolutions, and in an  
21 open meeting pass on them as resolutions to be  
22 presented to the membership for approval.

23           The target date for having this  
24 completed -- and hopefully you won't be throwing  
25 tomatoes at me a year from now. But the target date

1 for having all of this completed is close of  
2 business of the annual meeting of the membership in  
3 2018.

4 I hope that satisfies and answers the  
5 questions that people have, that our membership has.  
6 This is something that is not going to be, shall we  
7 say, a show stopper. But that's what we're working  
8 toward, is to try to have all of this in place by  
9 the time we walk out of the annual meeting in 2018.

10 I would like to thank everyone that's here  
11 this evening. We seem to have a major issue with  
12 some apathy within our membership. It seems like a  
13 lot of people are of the opinion that, well, when I  
14 turn my water faucet on, if water runs, well,  
15 everything is all right. And unfortunately in  
16 today's world, that's not true. And if things  
17 continue the way they're going in the water world,  
18 there could very well be on the horizon an  
19 opportunity to turn the faucet on and not get a  
20 drop.

21 I would like to enlist the aid of every  
22 person in this room to try and impress upon your  
23 friends, your neighbors, your fellow members that we  
24 need participation and we need their input. We need  
25 to know what their needs are so we can plan for the

1 future and we can plan for sustainability. We can  
2 work together to try to overcome the problems that  
3 we face. Please help us to generate interest and  
4 participation by our membership.

5 In closing, I'd like to state that our  
6 regular Board of Directors meetings are scheduled at  
7 9:00 a.m. local time on the first and third Thursday  
8 of every month in the conference room of the  
9 Association office located at 5535 Ledesma Drive in  
10 the village of Doña Ana. We normally have coffee  
11 and snacks available. All are welcome to become  
12 more familiar with how our Association functions.  
13 Please come visit us.

14 Our next item of business is a litigation  
15 report which will be presented by Mr. Peters, our  
16 retiring general counsel.

17 MR. PETERS: Thank you, Mr. Melton.

18 I've had the privilege of serving the  
19 Association for the last ten years as your attorney,  
20 and I'm sad to say I'm heading out. It's a slow  
21 road out, but I am heading out. This young man,  
22 Josh Smith, will take over all the legal matters for  
23 the Association, and I'm sure he'll do a fine job.

24 I have a very short report. We only have  
25 two items on the litigation list. They're old.

1 They're a case we filed against the Westmorelands  
2 regarding water rights that was tried before the  
3 water judge in November of 2014. We do not have a  
4 decision yet over two years later.

5 The other case is a case we filed -- or  
6 that Moongate Water Company filed against us. That  
7 was tried last year -- I'm sorry, the year before,  
8 December of 2015, over a year ago. We do not have a  
9 decision in that case. It was tried before the same  
10 judge, the water judge. We hope to have a decision.

11 We think that he's going to decide both of  
12 them at the same time. We're just waiting for that  
13 decision to come. These were complicated water  
14 rights and contractual cases regarding some water  
15 rights that we purchased that everybody else thought  
16 they owned as well, and we'd like to have that  
17 cleared up.

18 So that's all the litigation that is  
19 presently active. And once that's finished, I'll be  
20 out of the picture except for being senior advisor  
21 to Mr. Smith here. So thank you all. I appreciate  
22 it.

23 MR. MELTON: Next on the agenda will be an  
24 engineering report from Ms. Lilla Reid with Souder,  
25 Miller & Associates.

1 MS. REID: Hello. It's nice to be here.  
2 So we actually have quite a few projects going on  
3 right now, and so we'll -- I'll try to talk you  
4 through them and see if some of you guys are being  
5 impacted by construction. That might be the case.

6 In 2016 there were two planning documents  
7 completed. There's a wastewater discharge permit  
8 turned in to the Groundwater Quality Bureau. And  
9 then there was a wastewater treatment plant  
10 engineering report that was also turned in to the  
11 same agency.

12 Right now there's three planning projects  
13 being worked on. And then we get to the fun stuff  
14 for me which actually goes into design and  
15 construction. So if we go to the next slide, we  
16 actually have quite a few projects in design, and  
17 they have been designed.

18 In 2016 there were actually six projects  
19 completed design. And then there's two right now  
20 that are being designed and actually in review. And  
21 then we actually have two that are being designed as  
22 well.

23 And in construction we actually have four  
24 projects that were actually completed last year.  
25 The SCADA project was one that went over the two

1 years; so you probably heard about it a couple  
2 times. Multiple locations for the railroad  
3 crossing. And we actually have two in construction  
4 right now that I kind of referred to earlier in the  
5 presentation.

6 We did a Blue Hawk water line extension  
7 which was a 4-inch water line, about a mile of water  
8 line on that one. And there was an EBID crossing  
9 and some easements.

10 Then the next one, we did finish the  
11 design of the Picacho Hills water system. I know  
12 you guys have heard of this one and probably have  
13 seen it. But it is about 2 miles of water line.  
14 There is 1.8 million gallons worth of water storage,  
15 and there's going to be a new water source put on  
16 line up there when that project is completed. We  
17 finished the design, and it is in construction as  
18 well.

19 The vacuum station, this is actually one  
20 that's kind of exciting because it does open the  
21 door to wastewater collection in the southeast  
22 collection area. This area overlaps most of  
23 District 3 -- well, some of District 3 and some of  
24 District 4 in there. So it is really exciting to  
25 have the opportunity to start. The first phase,

1 we'll actually be building the actual building  
2 itself and then equipping the vacuum station with  
3 the equipment. And then there will be a force main  
4 associated with that next.

5 The design for the transmission line  
6 project was actually started and completed in 2016.  
7 This included about 3.2 miles worth of water line.  
8 There was water on -- a water line on Valley,  
9 Taylor, and on Doña Ana Road.

10 The next one that started about a month  
11 after this was finishing all of Taylor Road. So we  
12 continued the transmission line project, and we did  
13 about 1.2 miles to finish off West and East Taylor  
14 Road there. So that's all 18-inch pipe.

15 The design on Fairview II, this one is  
16 also really neat because it actually connects  
17 District 5 to District 4 water lines. So this  
18 actually put a physical connection. So this is a  
19 very -- I mean this corridor is going to be very  
20 challenging. There is a number of utilities. It's  
21 very, very crowded in there. It's 12-inch water  
22 line, and it is about 1.2 miles. And this, like I  
23 said, will actually do a physical connection between  
24 the Picacho Hills and the Doña Ana water systems.

25 The Radium Springs, we actually originally

1 did Phase 1 of Radium Springs, and it was about  
2 2.3 miles. And that included some state funding,  
3 and we designed that.

4 And then they ended up with additional  
5 funding for that project. Doña Ana Mutual, you guys  
6 received additional money, and we designed Phase 2  
7 which included an additional 5.3 miles of water line  
8 and 50 -- over 50 fire hydrants, a new booster  
9 station, and rehabbing all existing tanks. So this  
10 project right now has a total of 7.6 miles of water  
11 line, is in review from the agencies right now, and  
12 we're really hoping to start construction on this  
13 project hopefully first quarter of 2017.

14 But it does have state and federal  
15 funding, and so sometimes the duration to get  
16 through all of the paperwork takes a little bit  
17 longer. But it will definitely start in 2017.

18 The next project is the force main. This  
19 force main will actually connect that vacuum station  
20 to the City of Las Cruces for treatment. So this  
21 will actually be the physical connections for that  
22 force main.

23 And then next we're going to just go to  
24 the construction projects that are actually in  
25 progress. This is actually one that just started

1 last week. This is by that St. John's Mobile Home  
2 Park, just to the north of it, just so people kind  
3 of have an idea where it is. It's off the road  
4 there, off of El Camino Real. There is dirt work  
5 going in there; so you will actually see dirt work.  
6 And we're hoping to pour concrete before the end of  
7 the month.

8 Projects we completed included the  
9 Fairview Water System. This one was over 3 miles,  
10 and this actually took the water over the river and  
11 serves -- and I guess in this case has 12-, 8-, and  
12 16-inch water line. So this is the one we're going  
13 to connect to on Fairview II to connect District 5  
14 and District 4 together.

15 We completed the Headworks Project. This  
16 is actually what is constructed out on-site. This  
17 is actually what is going to screen the wastewater  
18 before it goes into the wastewater treatment plant.  
19 So since there is going to be a design to redo the  
20 wastewater treatment plant, we wanted to keep all  
21 the debris out that we could. So this is actually  
22 what does that so that all the new equipment we put  
23 in, any pumps, they're not actually worn down very  
24 quick. So that's a good project to have that in  
25 place ahead of the improvements at the wastewater

1 treatment plant in District 5.

2 And then Picacho Hills, this actually has  
3 a few photos after it as well of the actual  
4 construction, the footing of the tank, building the  
5 tank. There's two of them up there, both of them  
6 900,000 gallons.

7 If you guys do see any vandalism, please  
8 let us know. The tanks were vandalized twice on the  
9 inside. The current project that we actually have  
10 going on down in -- the transmission line project  
11 that's in Doña Ana, we've had at least three water  
12 meters stolen including somebody drilling through  
13 the water meters.

14 So if you guys happen to see anything,  
15 please let us know because it's very discouraging  
16 sometimes to have that kind of vandalism going on.  
17 So if you see something, please let us know. It  
18 makes construction go faster if we don't have any of  
19 those problems.

20 So this is the transmission line project.  
21 What was actually awarded was on Valley and Taylor.  
22 And so I believe it's -- well, it is 3.6 miles worth  
23 of 18-inch water line. And this is great because it  
24 actually loops District 4 and District 5's --  
25 Districts 2, 3, and 4 will actually have an 18-inch

1 loop running through them at this point with this  
2 connection.

3 Here's some construction photos, 18-inch  
4 pipe shown on the side of the road strung along.  
5 There's actually a casing in locations that we're  
6 going under canals or under a road. We are actually  
7 putting 30-inch casing, and we're running our  
8 18-inch pipe through it. And just some additional  
9 construction photos there and putting in some vaults  
10 during that.

11 And then there's some mishaps. This is  
12 actually not a swimming pool that we're putting in.  
13 This really was supposed to be water line next to  
14 existing water line where the contractor actually  
15 hit it. So we have some really good things going on  
16 in construction, and then every now and again, we  
17 have a few hiccups.

18 So thank you very much. I appreciate  
19 working for Doña Ana Mutual and appreciate all your  
20 time. Thank you.

21 MR. MELTON: Next up on the agenda is our  
22 executive director for her report.

23 MS. HORTON: Good evening. I am going to  
24 do a service award for two of our employees who have  
25 reached their five-year mark, and then I am going to

1 yield the rest of my time to our secretary/treasurer  
2 for the financial report.

3 We have two employees this year that have  
4 been with us five years; so we would like to  
5 recognize that. Those employees are George  
6 Castillo, our Level 4 water operator, and Alfonso  
7 Chavez, our Level 2 water operator. And Alfonso is  
8 not here tonight. He is out sick. So we'll give  
9 him his award tomorrow when he comes back to work.

10 Dr. Anderson, the floor is yours.

11 DR. ANDERSON: First, I will be brief.

12 Budgetary reports are always very dull things.

13 We have three funds, basically. There's  
14 our general operating fund. The general operating  
15 fund this last fiscal year had a total revenue of  
16 \$3,681,000 and some change. The expenses were  
17 \$2,924,000 and some odds and ends. And the net  
18 operating surplus in this fund is about \$757,000.

19 The second fund is our grant and our loan  
20 fund. This is where grant money comes in and goes  
21 out. Our grant revenues for the fiscal year were  
22 \$3,404,000 and a bit. Our expenses from that  
23 particular fund were \$3.6 million. And the net  
24 result was a deficit on that fund of \$211,000.

25 And our third fund is the restricted

1 reserve fund. Grant expenses in that particular  
2 fund totaled \$643,000. The net deficit in that fund  
3 is about \$97,000. And of course those deficits are  
4 made up for by the surplus in the revenue funds.

5 As Jennifer mentioned, our audit -- the  
6 current audit sits up in the State, and we're not  
7 allowed to release the details of the audit until  
8 it's cleared the officials up there. But it is a  
9 clean audit. Our previous year's audit had only one  
10 finding on it, and it was because the audit was  
11 late. But that's all been taken care of.

12 So financially, Doña Ana Water is in good  
13 shape, and we have enough reserve funds to cover  
14 additional expenses that might come up in the  
15 future. If there's any questions, any details, I  
16 will defer those to our executive director who has  
17 all the details.

18 The final budget report which has all the  
19 little bits and pieces in it will be put online and  
20 will be available for anyone who wants to download  
21 the details. That's all I have to say.

22 Back to you, or are you done?

23 MS. HORTON: I'm done.

24 DR. ANDERSON: You're done. Okay. Thank  
25 you.

1 MR. MELTON: The next item on the agenda  
2 is an item for public input.

3 Do we have anyone who wishes to have input  
4 from the public, from our membership?

5 Yes, sir. Please come forward to the mic.  
6 State your name, please, sir.

7 MR. WILBURN: My name is Bill Wilburn.

8 MR. MELTON: Can you get the mic a little  
9 closer?

10 MR. WILBURN: Okay. Can you hear me any  
11 better?

12 MR. MELTON: No.

13 MR. WILBURN: Well, I'll speak up.

14 MR. MELTON: Okay.

15 MR. WILBURN: I live in Picacho Hills, and  
16 the new water lines have gone in. I understand that  
17 during the engineering and that, there's supposed to  
18 be five major checks in the water system that  
19 controls the pressure in the system. And I'm also  
20 under the impression that it's being recommended  
21 that additional pressure regulators be put on  
22 individual properties.

23 Is that -- can you give me some input on  
24 that so -- I live in Picacho Hills on Las Casitas,  
25 and I've got 39 units in there, and people have been

1 asking me. I would like to get some clarification  
2 on what we need to do to have it safe. We don't  
3 want lines blowing out or problems inside of the  
4 houses.

5 MS. HORTON: That is correct. We are  
6 going to be putting in four PRVs in the street in  
7 the main lines to regulate the pressure. The  
8 individual regulators that go at the homes are at  
9 the choice of the homeowner. It is not something we  
10 are recommending nor discouraging. If you wish to  
11 put it, you put it as additional backup. But we do  
12 have multiple PRVs within the system to regulate  
13 pressure.

14 MR. WILBURN: You know, we've had some  
15 people that the minimum charge has been like \$350 to  
16 have it installed. But if you have to have your  
17 driveway or anything like that, it can be well over  
18 a thousand dollars. People are concerned. I mean,  
19 yeah, it's an extra backup, but is it something that  
20 is needed?

21 MS. HORTON: There's no guarantee that a  
22 pressure-reducing valve would not fail at some  
23 point. Anything can fail. But they are brand-new,  
24 the ones that are going in. The seven that are  
25 existing are being replaced with new PRVs as well.

1 MR. WILBURN: What pressures should people  
2 be expecting in the units?

3 MS. HORTON: We like to keep our system  
4 between 60 and 80 ideally.

5 MR. WILBURN: Okay. And that should --  
6 say if it goes to 80, is that a pressure that will  
7 cause destruction of anything inside? Let me ask  
8 you as far as is there -- I know I do RVing, and  
9 usually the number set is about 90 on the pressure  
10 regulators for your motor homes and things like  
11 that.

12 MS. HORTON: Your home should be regulated  
13 or should be able to accept somewhere between --  
14 somewhere around 150 p.s.i. That does not  
15 necessarily mean your appliances are rated for that.  
16 Appliances are all different. Dishwashers tend to  
17 be susceptible. That would be something you would  
18 have to look at, who manufactured it and the model,  
19 and look and see what the manufacturer  
20 recommendation is.

21 MR. WILBURN: Do we know if there is going  
22 to be a test time? Can people expect -- because if  
23 we knew there was going to be a time in which the  
24 testing was going to be done, people may want to  
25 turn off certain appliances and stuff like that to

1 preclude bursts in pressure that would maybe cause  
2 certain units or certain appliances to malfunction.

3 MS. HORTON: Once we get ready to start  
4 bringing the system online, we will do it section by  
5 section to make sure we are regulating pressures  
6 within the ranges we expect to see. If something is  
7 not where we expect, we will shut it down and figure  
8 out how to get it to the pressure that we need to.

9 Those time frames will be posted because  
10 there will be water outages associated with that.  
11 When PRVs go on line, there will be some water  
12 outages. And then as we start isolating the system,  
13 you'll see some additional water outages.

14 MR. WILBURN: Okay. And you did say that  
15 you thought that the pressures for appliances should  
16 be somewhere around 150?

17 MS. HORTON: Your home is rated for 150.  
18 Your appliances can differ. Your irrigation system  
19 is another susceptible place.

20 MR. WILBURN: It's what?

21 MS. HORTON: Susceptible to not  
22 withstanding high pressure.

23 MR. WILBURN: "High pressure" being what?

24 MS. HORTON: 150 -- depending on what kind  
25 of irrigation system you have in with valves and

1 piping, it may not like 150 p.s.i. Not that we  
2 expect our system to be anywhere close to that.

3 MR. WILBURN: If it got to 100, do you  
4 think that most systems should handle that?

5 MS. HORTON: I don't know.

6 MR. WILBURN: Or you mean like sprinkler  
7 systems and that?

8 MS. HORTON: Some people's will, some  
9 people's won't. It depends on brands, how it was  
10 put in. There's lots of factors that go into that.

11 MR. WILBURN: Okay. All right. Thank you  
12 very much.

13 MS. HORTON: You're welcome.

14 MR. MELTON: Mr. Hayhoe?

15 MR. HAYHOE: My name is Jim Hayhoe. Just  
16 to expand on that point -- and I guess I probably  
17 should have talked to Bill Wilburn somewhere along  
18 the line.

19 Speaking from a Picacho Property Owners  
20 Association standpoint, we put together a purchase  
21 plan for -- a bulk-buy purchase plan for house-level  
22 PRVs. To date, 223 people have signed up and have  
23 had the PRVs installed. The average cost has been  
24 around \$175. The maximum that we've seen in any  
25 installation has been \$300. So I don't think we

1 have to worry about any thousand-dollar  
2 installations. Even the ones that are located in  
3 the driveways, we've been able to figure out a way  
4 to work around those.

5 The reason we did this is that we're  
6 identifying it as an insurance item that simply  
7 backs up those commercial PRVs which are going to be  
8 in the system. The other reason we did it is a  
9 couple of us went around a couple of months ago and  
10 did a number of pressure checks around the system.  
11 We looked at almost 45 different households across  
12 Picacho Hills, and we found pressures varying all  
13 the way from 29 p.s.i. to 105 p.s.i.

14 That worried us. That's the reason we  
15 thought we'd go forward with this and offer it as an  
16 insurance item only, not as a requirement.

17 MR. MELTON: Thank you.

18 Yes, sir, right here.

19 MR. ROBERTS: Hi. I'm Todd Roberts, and I  
20 live up in Picacho Hills. We've covered -- a couple  
21 of items that we already covered. I noticed that  
22 your regulation, your approval was for 60 to  
23 80 pounds p.s.i. on your system that you put up  
24 there.

25 MR. MELTON: That's our target.

1 MR. ROBERTS: The way the State states it,  
2 it's a recommended standard that they approved your  
3 system with. Is that not correct? This is Angela  
4 Faye Cross's letter to me.

5 MR. MELTON: Well, I believe that's  
6 probably a recommendation by the State; right?

7 MR. ROBERTS: I understand from what she  
8 told me, she said -- I asked if there's regulations  
9 that limit the operations of pressure and  
10 distribution. And as I stated during our  
11 conversation, the acceptable pressure is 60 to  
12 80 p.s.i.

13 MR. MELTON: That's a recommendation, not  
14 a requirement.

15 MR. ROBERTS: Well, okay. So you say that  
16 your system is not designed for that?

17 MR. MELTON: That's not what we said at  
18 all, sir. What we said was, as I understood our  
19 executive director, that we try to maintain our  
20 system between 60 and 80 pounds. We cannot  
21 guarantee 100 percent compliance with that 24 hours  
22 a day, 7 days a week. I mean unfortunately  
23 mechanical things fail. And that being the case, we  
24 provide the best service we can at the pressures  
25 closest to the recommendations.

1 MR. ROBERTS: Right. Okay. This is your  
2 bulletin that was sent out, and I noticed at the  
3 bottom of it "We expect to regulate and maintain  
4 pressure under 100 pounds p.s.i." That could be  
5 99 pounds. So don't you think that you should be  
6 saying 60 to 80 p.s.i. so you don't wave this around  
7 and say, well, we already told you we're going to be  
8 at 100?

9 MR. MELTON: We're going to tell you that  
10 we will try to maintain it at 60 to 80.

11 MR. ROBERTS: Well, I understand that.  
12 But what I'm saying is --

13 MR. MELTON: Your point is well taken,  
14 sir.

15 MR. ROBERTS: -- you're sending something  
16 that says it's 100 pounds. So if you correct it,  
17 that's all I'm talking about. Okay?

18 MR. MELTON: Okay. Very good.

19 MR. ROBERTS: Thank you.

20 MR. MELTON: We can take care of that, I  
21 think.

22 MS. HORTON: Our target range is 60 to 80.  
23 But if you see a failure with a PRV, which is what  
24 we've been experiencing in Picacho Hills, you will  
25 see pressures in the 100 range. So there's no way

1 we can guarantee it's never going to be around that.  
2 But the goal and the target is 60 to 80. But you  
3 are going to see spikes around 100, and that's what  
4 you've been seeing in Picacho recently with the  
5 failures in the PRVs.

6 MR. ROBERTS: I accept that. What I'm  
7 saying is it shouldn't be in writing that you're  
8 looking at 100 or less.

9 MS. HORTON: That's in the event of a  
10 failure.

11 MR. ROBERTS: It doesn't say that. So if  
12 that can be corrected. Thank you.

13 MR. MELTON: Anything further?

14 Yes, ma'am. You've been very patient with  
15 us.

16 MS. WINANS: My name is Charlotte Winans.  
17 I live on Eagles Nest Road. Several years ago when  
18 the water lines were put in and the water meters and  
19 the hydrants and all that stuff was put in, there  
20 was damage done to Eagles Nest Road on the west end  
21 closest to Doña Ana Road. And for a long time there  
22 was a great big circle where the damage was by the  
23 water people that said repair.

24 Well, that's long since gone, and it's  
25 still in need of repair, and it's deteriorating with

1 all the rain because we've always had this lake. So  
2 I'm here to --

3 MR. MELTON: Damage on Eagles Nest Road  
4 you say?

5 MS. WINANS: Yes, sir. It's in front of  
6 the Brills' home.

7 MR. MELTON: I'm not aware of any issues.  
8 Are you, Jennifer?

9 MS. HORTON: No, I wasn't aware of that  
10 issue. That was from our Doña Ana School Road  
11 project. We'll be happy to go out, if it's damage  
12 that our contractor did, and look at that and see  
13 what needs to be done to repair it. If it's paving,  
14 we contact the County because it is a county road  
15 there at Doña Ana Road and Eagles Nest.

16 MS. WINANS: I was the instigator for  
17 having that road paved, and so that's why I want to  
18 see that it continues to stay paved.

19 MS. HORTON: Let us go take a look at it  
20 and see what we can do.

21 MS. WINANS: All right. Thank you so  
22 much.

23 MS. HORTON: You're welcome.

24 MR. MELTON: Mr. Butler way in the back.

25 MR. BUTLER: Mr. President and members of

1 the board --

2 MR. MELTON: Please state your name.

3 MR. BUTLER: Oscar Vasquez Butler.

4 Actually, I'd like to congratulate the  
5 Board and Mr. President for really the  
6 aggressiveness that Doña Ana Water has taken in  
7 pursuing grants and leveraging those grants. Having  
8 been a president of the Board myself, I know that  
9 it's very difficult to get a grant.

10 And a lot of that is attributed to Souder  
11 Miller and their engineering and their planning  
12 because they're convincing to the Board, the  
13 Colonias Infrastructure Board, which I'm a member  
14 of. So they have a very persuasive way with words,  
15 which is good.

16 So just to congratulate you and also to  
17 comment on Picacho Hills water pressure. There was  
18 a time they didn't have any water pressure, and they  
19 couldn't flush or even wash their hair in the  
20 morning because of lack of water pressure. And  
21 that's why Doña Ana Water has accessed some in that  
22 area. That is a region now of service.

23 It does me good to hear that they're  
24 trying to regulate water pressure. So I think  
25 that's a tribute to you that we've been able to

1 service a particular area, a very affluent area that  
2 is deserving of the service, but a service that was  
3 well needed and they're getting it now. And now the  
4 concern is too much pressure. So it's a tribute to  
5 you.

6           Secondly, I think you should announce more  
7 of the leveraging that you're doing with other  
8 agencies. Because I know from being on the Board  
9 that we kind of give brownie points not only for  
10 your leveraging, but you're kind of encircling the  
11 whole district with water, saving water. And you  
12 were talking about the conservation of water.  
13 You're doing a very good job at that.

14           And lastly, I think you ought to beat your  
15 chest with how many fire hydrants you're putting in.  
16 That is really a County responsibility in terms of  
17 firefighting services. But because there's grants  
18 to provide fire hydrants and lower the fire ratings  
19 for a lot of your communities -- and I addressed  
20 this up at Radium Springs -- you should really do an  
21 assessment as to the fire ratings and the services  
22 that you're providing within the respective  
23 communities because I know a lot of folks are  
24 concerned with water rates going up, and they really  
25 like the fire insurance policies going down. So you

1 can see that there's a two-way street there.

2 But congratulations on what you're  
3 providing us in terms of a Board. Thank you.

4 MR. MELTON: Thank you, sir.

5 Anyone else? Yes, sir. Please state your  
6 name.

7 MR. HOKKANEN: Jack Hokkanen. You  
8 mentioned in your report that -- you were talking  
9 about meters and, if you have a suspect meter, that  
10 you could go through the process of testing it and  
11 all this. And then you said then we would compare  
12 that to the standards or the specifications that we  
13 go by.

14 What do you go by? Industry standards?

15 MR. MELTON: Our standards, Jennifer, are  
16 plus or minus 3 percent?

17 MS. HORTON: 3 percent.

18 MR. HOKKANEN: Is that an City standard?  
19 Is that typical?

20 MS. HORTON: No.

21 MR. HOKKANEN: It's something you made up  
22 or adopted?

23 MS. HORTON: Utilities have their own  
24 based on history with accuracy of years.

25 MR. HOKKANEN: But that's what you

1 adopted?

2 MS. HORTON: Yes.

3 MR. MELTON: It is a local standard.

4 MR. HOKKANEN: It's a utility standard?

5 MR. MELTON: It's a local standard for  
6 this utility, our specification.

7 Ma'am, could I get you, please?

8 I'll get you in a minute, sir.

9 MS. HERBERGER: Hi. I'm Margie Herberger.  
10 I'm living in Picacho Hills, and I just had a  
11 question.

12 Jennifer, you mentioned when the testing  
13 will begin -- you said something like it will be  
14 posted when the outages will be.

15 What does that mean? Will it be on the  
16 web site? Will we be let know?

17 MS. HORTON: It will be on the web site,  
18 and we'll also use our call notification to notify  
19 the public as well.

20 MR. MELTON: Oh, no.

21 MS. HERBERGER: Okay. Because I was told  
22 that the call notification, which we did get  
23 multiple times, thank you very much, they actually  
24 gave the wrong date for this meeting.

25 MR. MELTON: Initially we did.

1 MS. HORTON: That was my mistake.

2 MS. HERBERGER: Okay. So we'll know?

3 MS. HORTON: Yes.

4 MS. HERBERGER: All right. That's good.  
5 Thank you very much.

6 MR. MELTON: Additionally, I might point  
7 out that we do try to communicate frequently with  
8 the PHPOA so that they can utilize their resources  
9 to try to get the word spread in the Picacho Hills  
10 area. You really are fortunate in that you have  
11 that sort of a communication capability.

12 When you get into, for example, District 1  
13 which stretches from the road that runs between the  
14 two convenience stores in Doña Ana over to the  
15 river, basically, and all the way north to Radium  
16 Springs and we have no Homeowners Associations or  
17 anything like that, communication is a rather  
18 difficult feat.

19 So, you know, Mr. Beeson and his folks  
20 with the PHPOA are to be commended for volunteering  
21 to try to assist us in spreading the word out there,  
22 and I do appreciate it for us.

23 Anyone else? Twister?

24 I'll get to you next, sir.

25 MR. GEERY: Thank you for hearing me.

1 MR. MELTON: State your name, please.

2 MR. GEERY: My name is Floyd Geery.  
3 That's G-e-e-r-y, golf, echo, echo, radio, yankee.  
4 All right?

5 Now, we had a water outage on Sharon Q  
6 Lane today. I mean the water was coming up pretty  
7 well, and your team was on it almost immediately.  
8 So thank you very much. You're doing a good job.

9 MR. MELTON: Thank you, sir.

10 MR. GEERY: I've had a lot of elderly  
11 people out there that go drive at night -- in fact,  
12 they shouldn't drive in the day, some of them. They  
13 really are -- but they're asking about water  
14 pressures.

15 Are there any water pressure tests going  
16 to be done in the Radium Springs area? I know we're  
17 out there in the hinterlands, you know. But I just  
18 wondered, are there any plans?

19 MS. HORTON: Yes, there are. So with the  
20 upgrades to Radium Springs comes a new booster  
21 station.

22 MR. GEERY: So the whole thing is going to  
23 be --

24 MS. HORTON: There will be pressure zones  
25 created in Radium like we have in Picacho to

1 regulate pressure once that new booster comes on  
2 line.

3 MR. GEERY: So we're not being forgotten?

4 MS. HORTON: No, you're not being  
5 forgotten. You'll have fire hydrants and valves and  
6 pressure. You get lots of things.

7 MR. GEERY: We're going to get fire  
8 hydrants?

9 MS. HORTON: You are.

10 MR. GEERY: I'll be able to take a bath,  
11 huh? Anyway, I wanted to say that.

12 MR. MELTON: With me on the board, you  
13 think Radium Springs would get forgotten?

14 MR. GEERY: Of course not. But we have to  
15 sometimes push people's buttons. So thank you very  
16 much.

17 MR. MELTON: You, sir?

18 MR. VALDEZ: My name is John Valdez. I  
19 was just wondering. I live on the north end of  
20 El Camino Real, and I was wondering when will I be  
21 able to hook up into the sewage line?

22 MR. MELTON: We have our two experts right  
23 here.

24 MS. HORTON: Two different answers for  
25 that, I guess. We are in the process of working on

1 the southeast collection, which is going to serve  
2 part of the El Camino Real area. It's on the  
3 southern end, though, is where we're starting and  
4 working our way north.

5           Depending on funding is kind of the  
6 challenge. It's easier to find water funding than  
7 wastewater funding in this state. So we are going  
8 to do it piece by piece. That is a very large --  
9 about a 9-, 10 million-dollar project overall, and  
10 we've secured about 700,000 of that. We do have  
11 applications in for another 3 1/2 million with the  
12 federal government, with USDA. We do think that's  
13 going to get funded. In what cycle is the question,  
14 whether it's now or a year from now.

15           But there are some other options we can  
16 look at if you live near El Camino Real.

17           MR. VALDEZ: I live right on El Camino  
18 Real.

19           MS. HORTON: There are some other options  
20 we can discuss if you're needing it. If you've got  
21 septic or cesspool failing, come to me.

22           MR. VALDEZ: Yeah, that's why I ask.

23           MS. HORTON: Okay. Come see me and let's  
24 talk.

25           MR. VALDEZ: Okay. When?

1 MS. HORTON: I am out this week in  
2 training. I will give you my card, and you can call  
3 me, and we will set something up.

4 MR. VALDEZ: Okay. Thank you.

5 MR. MELTON: Anyone else?

6 Going once. Going twice. Sold.

7 I will now entertain a motion to adjourn.

8 MR. GEERY: I make a motion to adjourn the  
9 meeting.

10 MR. MELTON: I have a motion by Mr. Geery  
11 to adjourn.

12 MR. WINANS: I second the motion.

13 MR. MELTON: Your name, sir?

14 MR. WINANS: Jerry Winans.

15 MR. MELTON: Jerry Winans. I have a  
16 motion to adjourn by Mr. Geery, a second by  
17 Mr. Winans. All in favor?

18 (All say aye.)

19 MR. MELTON: All opposed?

20 (No response.)

21 MR. MELTON: Thank you very much. Please  
22 do me a favor and pat each other on the back for the  
23 turnout this evening. And please come see us at our  
24 regular board meetings.

25 (The proceedings concluded at 8:12 p.m.)
